

FOLLOWING IN THE STEPS OF JESUS CHRIST, WE EDUCATE THE MIND, BODY, SPIRIT OF OUR STUDENTS THROUGH CATHOLIC VALUES. WE ARE THE FAMILY OF OUR LADY OF GRACE ACADEMY.

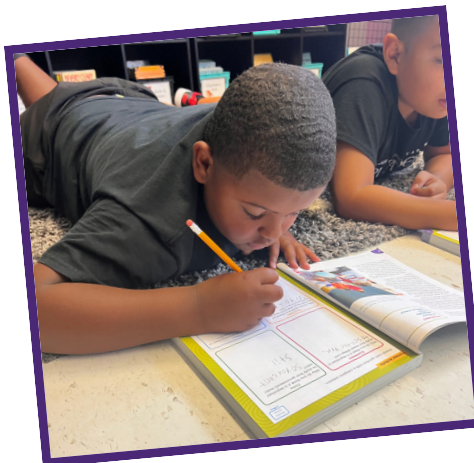

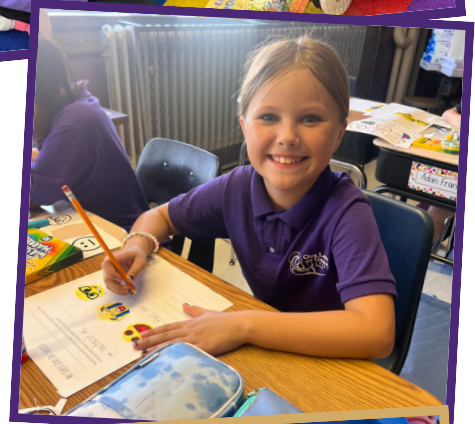

OUR LADY OF GRACE ACADEMY

PARTNER WITH US

As a school community, we work to assure every parent that their children will be known, valued, and respected as individual people, and that each day we will strive to help their children grow in all ways: spiritually, academically, emotionally, physically, and socially. Simply put, students will work to be who God created them to be.

In partnership with our school families, we recognize our students as unique individuals and treat them respectfully.

Our Lady of Grace Academy develops the intellect while providing a safe, caring environment in which students mature and reach their potential. Christ is always present, whether in the classroom, on the playground, at Mass, or during extracurricular activities.

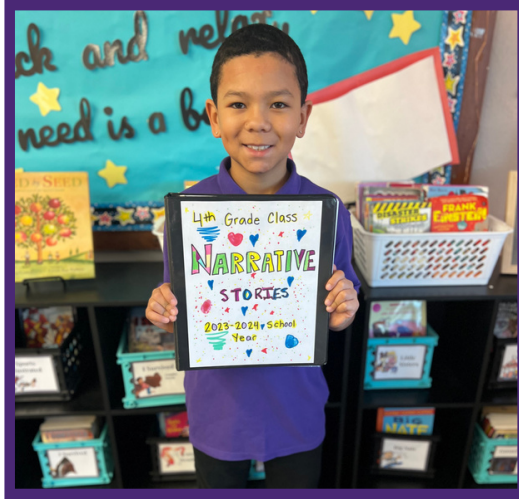

EDUCATING OUR STUDENTS

Our Lady of Grace Academy believes it is important to educate the whole student. This includes the spiritual, intellectual, moral, physical, emotional, and social growth of each individual student.

This is accomplished through rich coursework including:

- Math
- Science, STEM
- Reading
- Language Arts
- Religion
- Social Studies
- Art
- Physical Education
- Guidance
- Music
- Library

Technology, including 1:1 Chromebooks and student iPads, is integrated throughout all core subject areas and is available to all students 4K through 8th grade.

BEYOND THE BOOKS

FAITH - Students begin their day with our student-led morning broadcast and end the day in prayer together. Students also lead weekly Mass, Holy Days, and other special occasions. Father visits classrooms weekly for a unique Faith conversation as well!

ACADEMIC SUPPORT - We have a full-time School Counselor and a full-time Learning Support Coordinator. In addition, we also have Educational Assistants in K4, K5, and middle school.

EXTRACURRICULARS - We provide multiple opportunities for our students to learn new skills and widen their interests. After-school clubs and enrichment programs include after-school academic support, athletics, STEM Club, and Boy/Girl Scouts. We also partner with the John 23rd Educational Center to support our students as well.

STEM EDUCATION

STEM at OLOGA includes studying all aspects of the science field. Project Lead the Way, available to all middle school students, has given the students an opportunity to explore computer programming, become medical detectives, and engineer various items, including drawing in two and three dimensions with attention to detail and measurements for their drawings. Legos are used in classrooms to increase students' knowledge of the engineering process. Students also have the opportunity to complete labs in our newly updated Science Lab on the following topics: Scientific Method, phases of the moon, dissections, water cycle, and many more.
